Background and Introduction

CARE international in Pakistan implemented heatwave response project in district Sibi. The project aimed to protect the vulnerable community from heatwave by provision of protection kit, cooling stations, information through IEC material displayed at various parts of the districts. provided heatwave protection. In district Sibi 250 individuals were provided with heatwave protection kits.

Purpose of the study

The purpose of the PDM was to assess beneficiaries' access, use and satisfaction with the heatwave protection kit provided in District Sibi. The survey was undertaken after the completion of distribution process.

Methodology

Considering total beneficiaries (250) of the heatwave protection kit, a sample of 42 beneficiaries was selected for the PDM from eight union councils. The respondents were selected systematically from the list. Due to COVID-19, the data collection process was conducted telephonically by the MEAL Officer.

Limitations of the study

Due to pandemic, the physical verification of kits could not be performed. MEAL Officer contacted multiple time but relevant 8 respondents did not be contacted due to wrong number or not picking the call.

Study Findings

Feedback from beneficiaries

Feedback about the support was collected from the sample beneficiaries, one of the beneficiary shared, *"I am happy that someone is there to working for us"*. Another beneficiary shared, *"I am happy by receiving such a useful kit for protecting myself from heat stroke"*. One of them shared, *"The kit has good items for us specially umbrella, water container and ORS"*. Another one shared, *"The kit is very good for us while working in a sunny day. I would suggest please do more for other needy people too"*

Recommendations

1. The data collection team faced difficulties in getting response from the beneficiaries due to wrong number and none response from the selected beneficiaries. Considering COVID-19 situation, it should be practiced to get correct beneficiary contact number along with additional number of close relative for correspondence related the project.
2. Selection criteria and confirmation of beneficiary selection should be communicated to on time.
3. Names of four beneficiary mentioned in database but during interview they shared that they were not provided the kit. Database should be updated after distribution completed and mentioned if any beneficiary replacement took place during distribution.
4. Similar support should continue so that wider vulnerable people could get such a support.
